

Model quality

—●— Standard (medium2) —■— Small (cheap2) —▲— Best (best2)

Markers show logged evaluations; lines connect available generations.

Operator ablations

Standard No loss No survival
No mutation No selection

Markers show logged evaluations; lines connect available generations. Missing run: no-data-mut.

Meta-mutation ablations

Train score

Validation score

—●— Standard —▲— No refine —▼— No simplify
—■— No explore —◆— No crosscover

Markers show logged evaluations; lines connect available generations.

Prompt feedback ablations

Train score

Validation score

—●— Standard —■— No execution feedback —▲— Uninformative prompts + no feedback

Markers show logged evaluations; lines connect available generations.

Reevaluation ablations

Train score

Validation score

- Standard (population: 3 → 10)
- 1 run, no reevaluation
- 3 runs, no reevaluation
- 10 runs, no reevaluation
- Population reevaluation: 1 → 3
- Dynamic TTTS (top-k)

Markers show logged evaluations; lines connect available generations.

Task vs. top-k population

—●— Standard (task) —■— Top-k

Markers show logged evaluations; lines connect available generations.
