

MIPS: original method → PySR → PySR++ → fine-tuned

Overall problem coverage / 62

Exact SR subtasks / 51 (mean over seeds)

Overall: original successes retained + newly exact task groups; new groups lack full-program validation.
SR: 51 distinct subtasks × 3 seeds = 153 fits per method; 1 h/fit. Fine-tuned full evaluation pending.
Black dots: individual seeds.
